ECO-POLIS · THE CLIFF CITY PRESENTS

The Sea God Returns

Sơn Tinh & Thủy Tinh · the year 2050

GROUP 6 · CLASS 11A4 · LE QUY DON HIGH SCHOOL

SCENE 1

The Legend Returns

THE YEAR
2050

2050
Mayor Sơn Tinh
MAYOR

MEET

The Eco-Polis team

Linh
Princess Mỵ Nương

Nguyên
Sơn Tinh · the Mayor

Huy
Chief Architect

Bách
Energy Engineer

Khang
Safety Commander

Hưng
Thủy Tinh · the Sea God

THE CRISIS

Life on a sea cliff

Landslides

rain loosens the slopes

Almost no flat land

homes fight for narrow ledges

One road in, one road out

a jam that becomes a trap

No rivers on top

rain runs off the bare rock

THE MOUNTAIN TIMES · SEPT 2024

Typhoon Yagi cuts off whole villages

Lao Cai and Yen Bai are isolated. Army helicopters fly in food and supplies.

LET THE BATTLE
begin!
VS
MAYOR

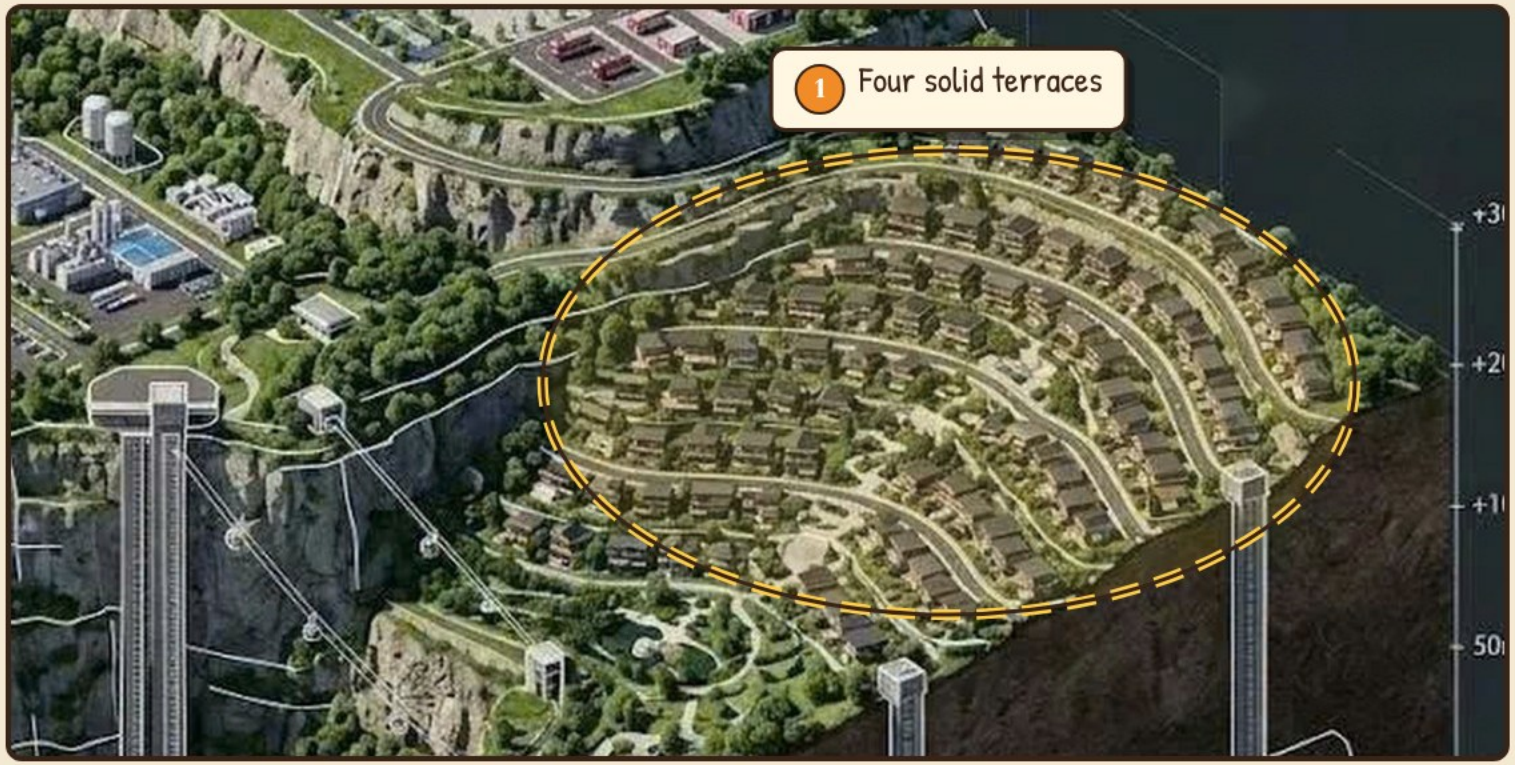

ATTACK 1
The Flood
MAYOR

Architect Huy
Chief Architect

ARCHITECT HUY · HOUSING

No house sits on a loose slope

6
districts on one rock

4
curved terraces of eco-homes

Car-free
pedestrian zones · cars stop at the gate

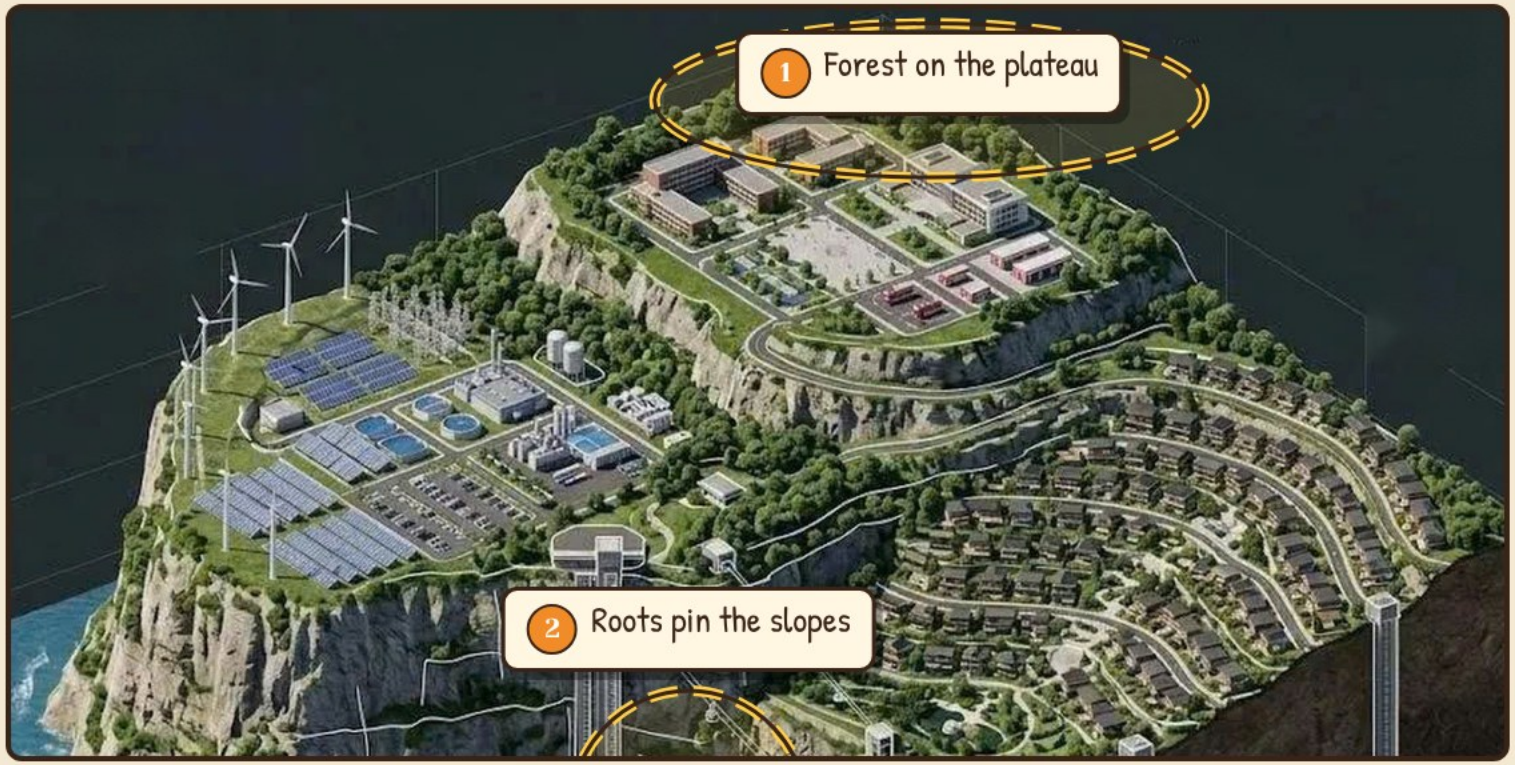

ATTACK 1
The Flood

Architect Huy
Chief Architect

ARCHITECT HUY · GREEN SPACES

Trees hold the mountain together

40 %
of the land stays green

Roots
hold the slopes together

Every roof
gives back a garden

OUR RESEARCH

Street interviews

Our street interviews

9 people from other countries

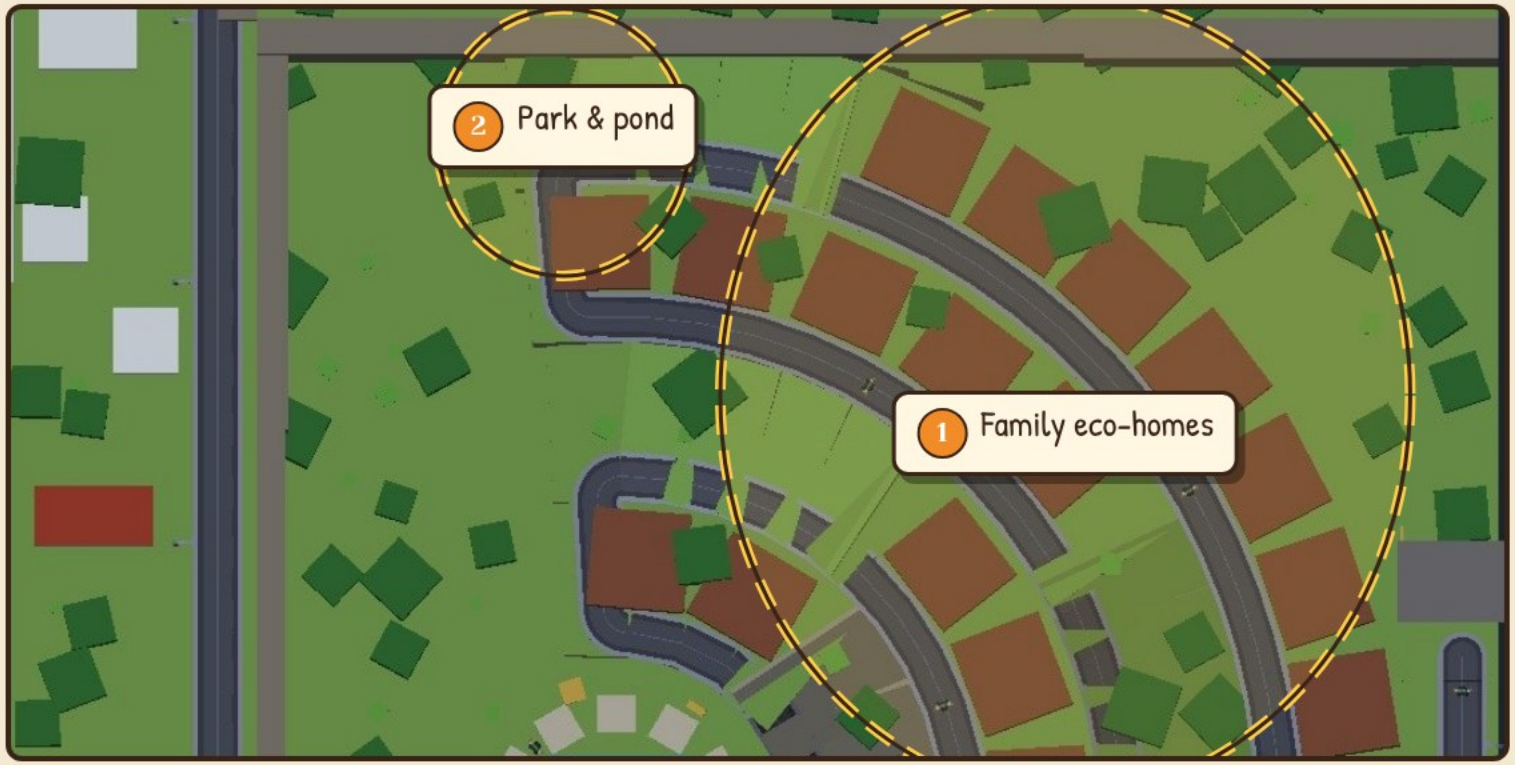

- ✓ Good infrastructure
- ✓ Easy transit
- ✓ Green spaces
- ✕ Housing costs & traffi

Architect Huy
Chief Architect

ARCHITECT HUY · HOUSING COSTS

Homes people can afford

1 in 3
homes: rent capped at 30 % of income

Shared
kitchens · tools · workspaces

Land trust
buyers pay only for the building

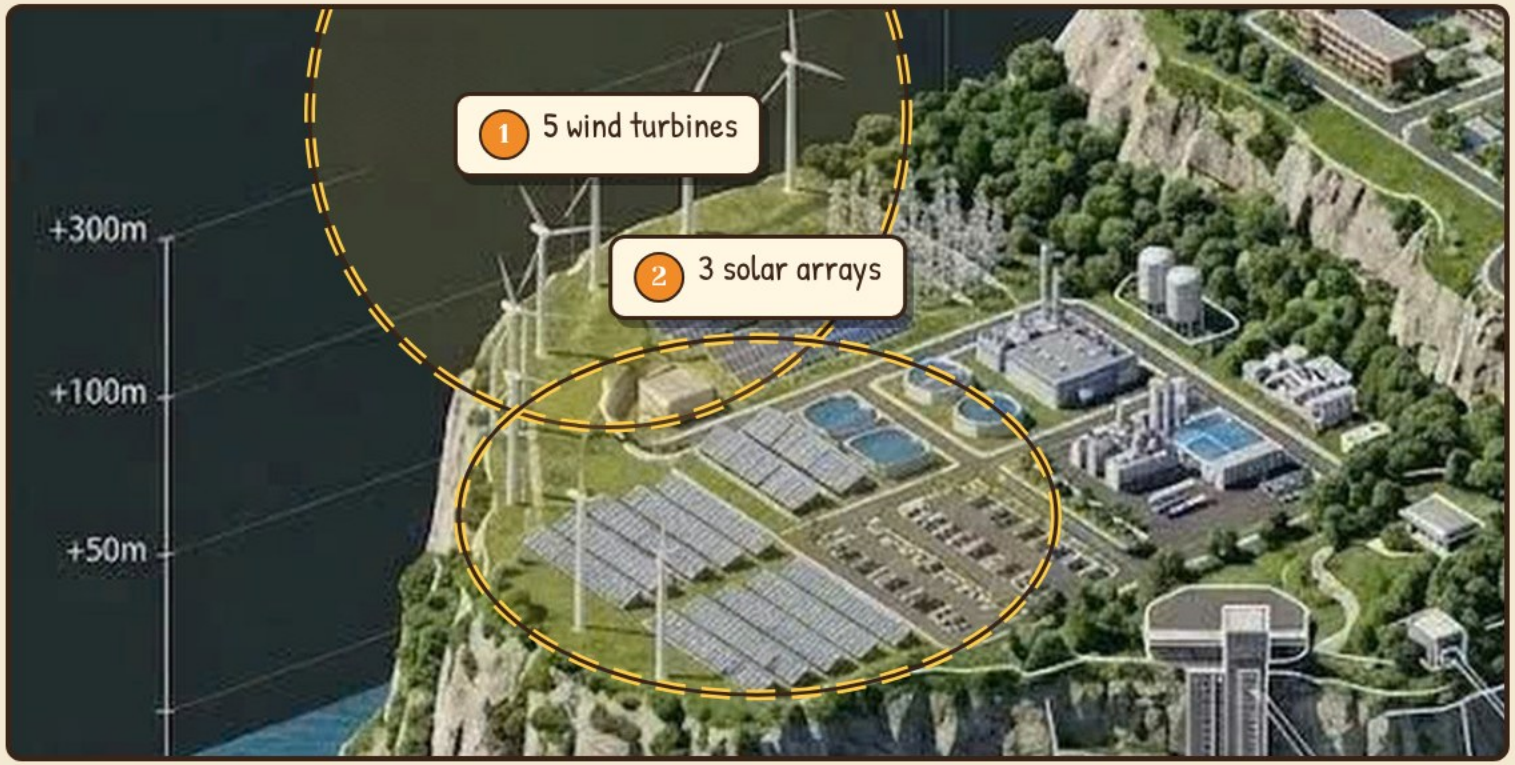

ATTACK 2
The Blackout

Engineer Bách
Energy Engineer

ENGINEER BÁCH · ENERGY

Clean power made on the cliff

100 %
renewable energy target

≈ 130 MWh
clean power every day

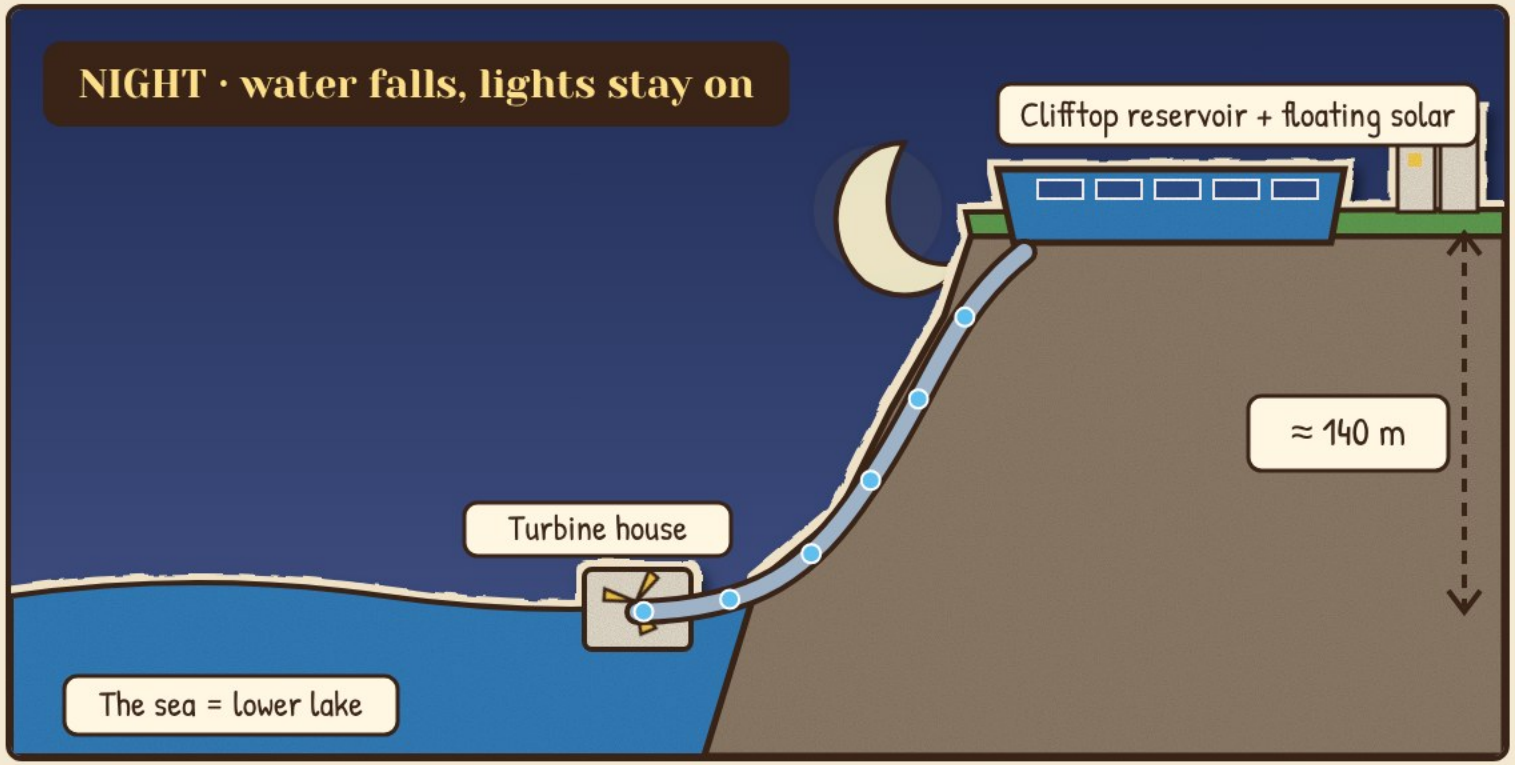

5 + 3
wind turbines + solar arrays

Engineer Bách
Energy Engineer

ENGINEER BÁCH · INNOVATION 01

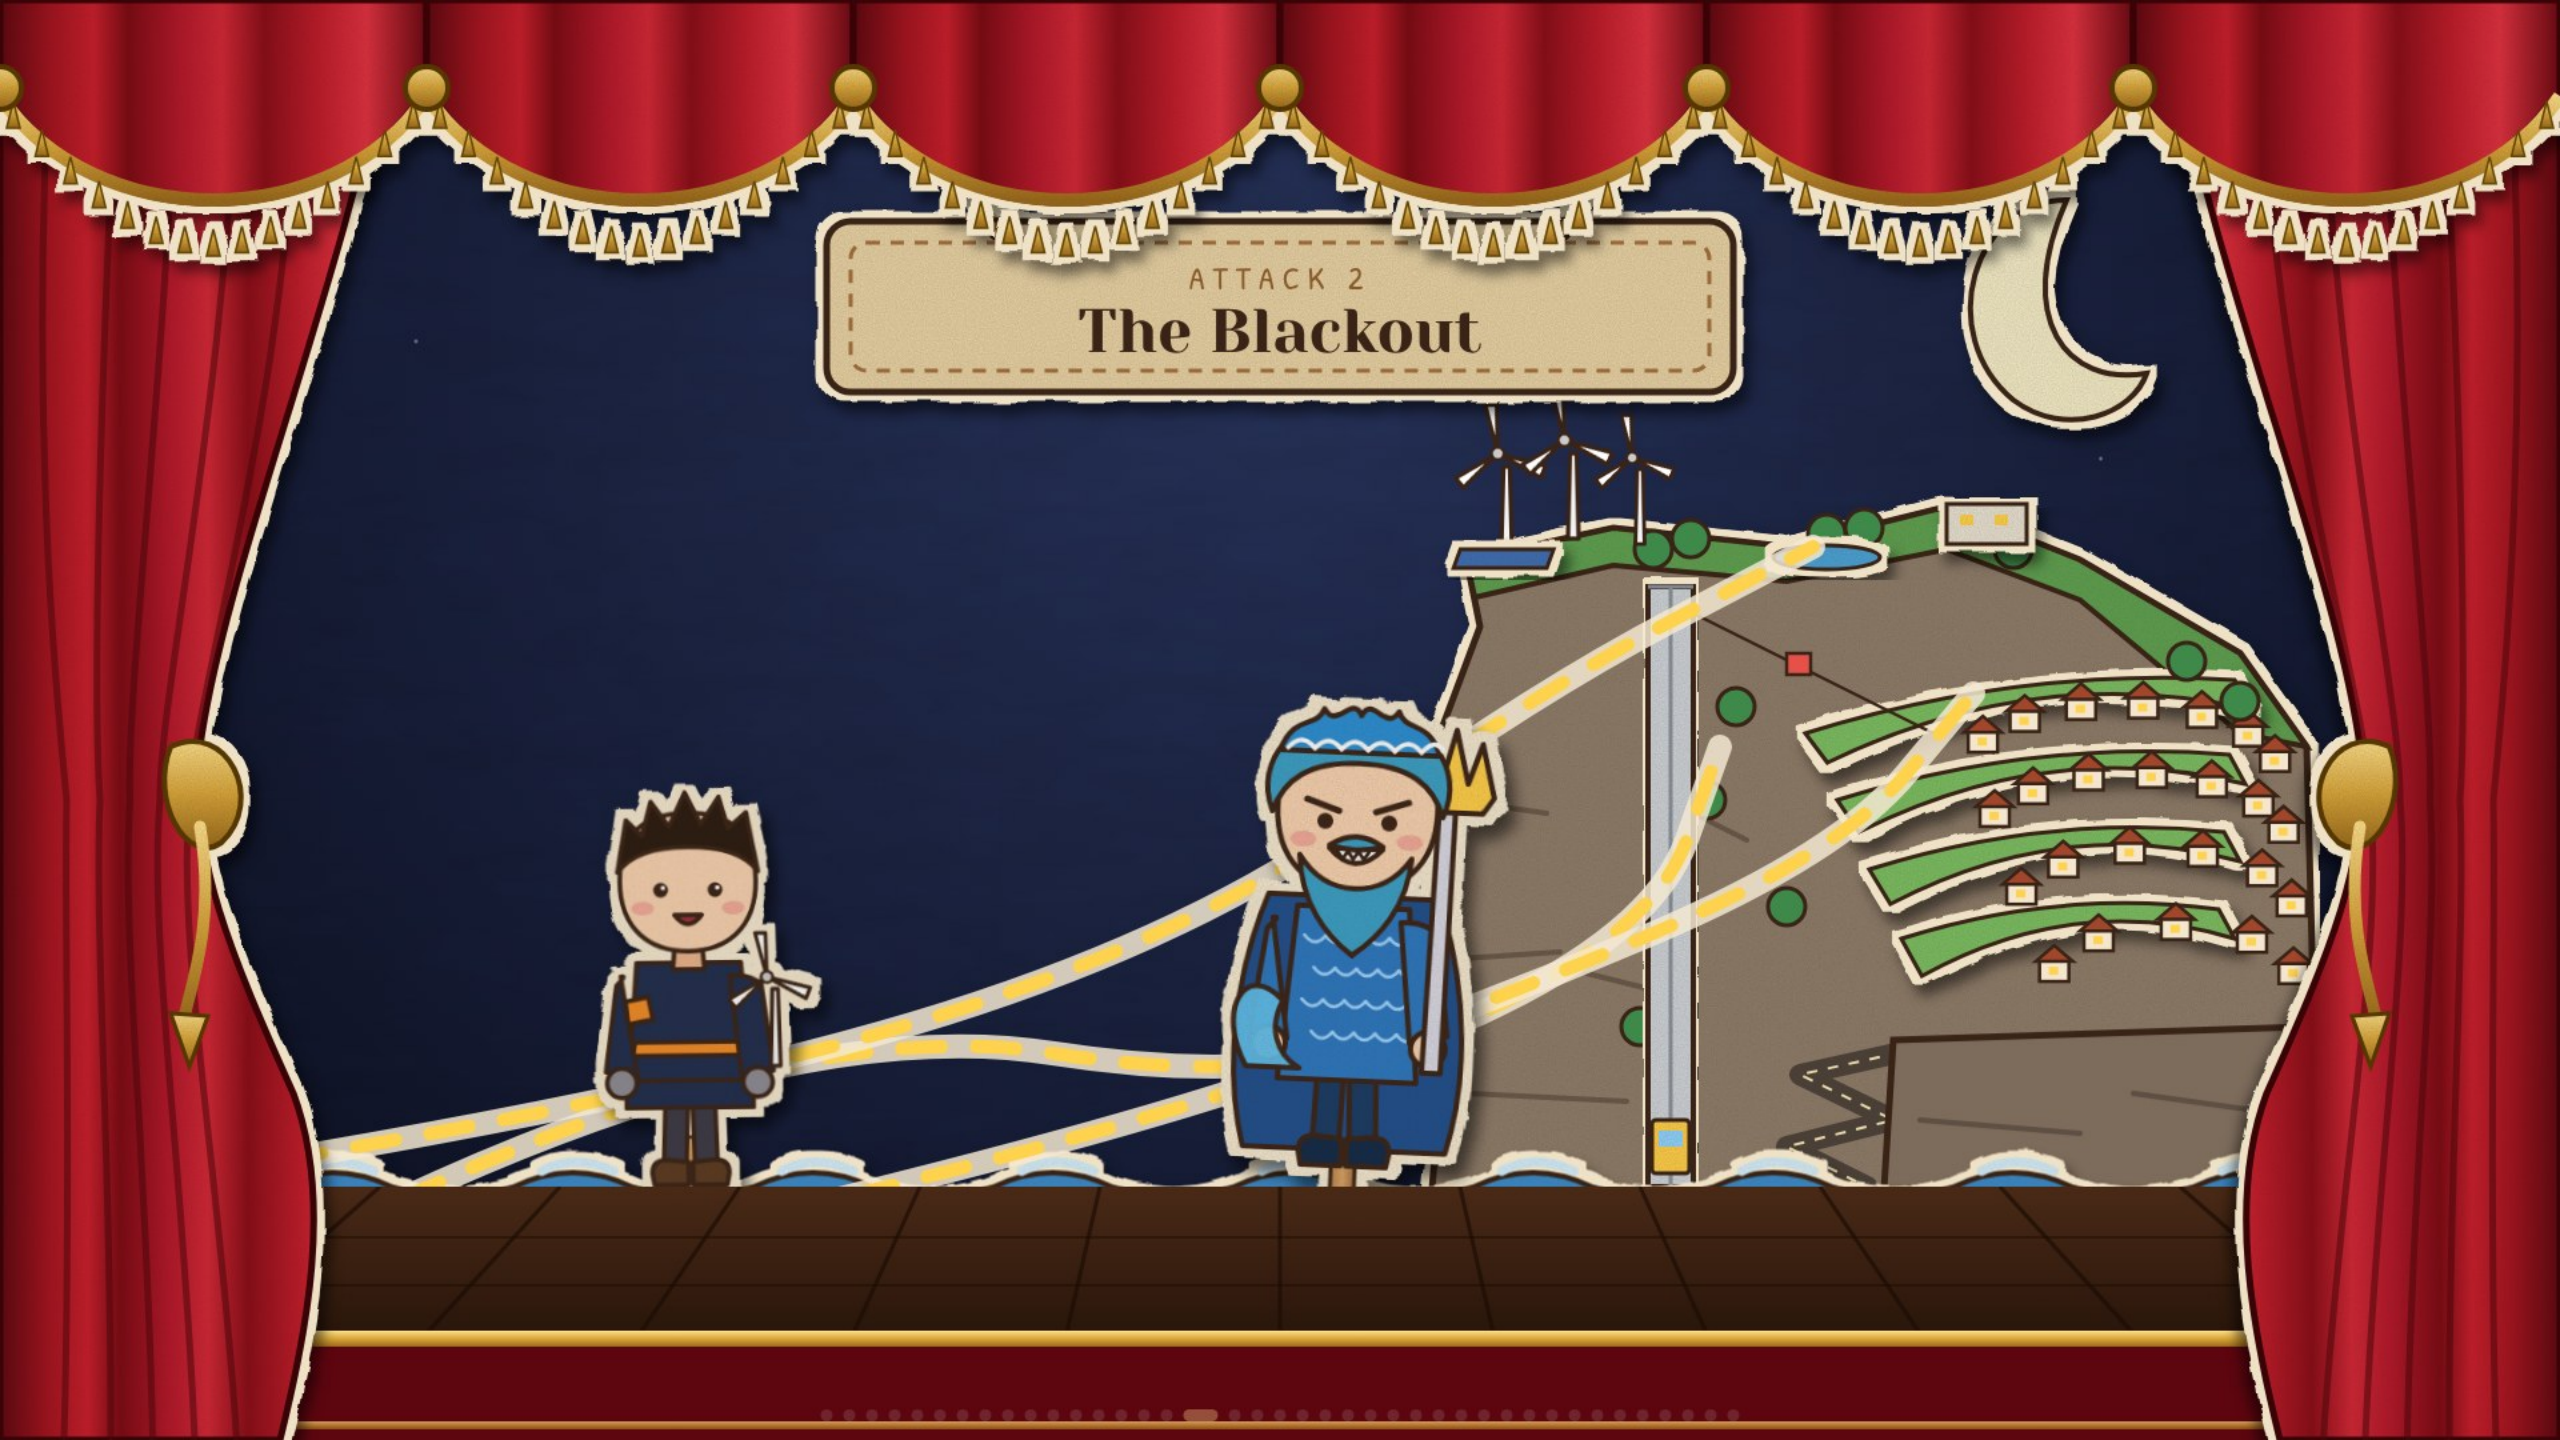

Your sea becomes our battery

≈ 58 MWh
stored in the clifftop reservoir

140 m
drop through the turbine

≈ 18 h
to run the whole city

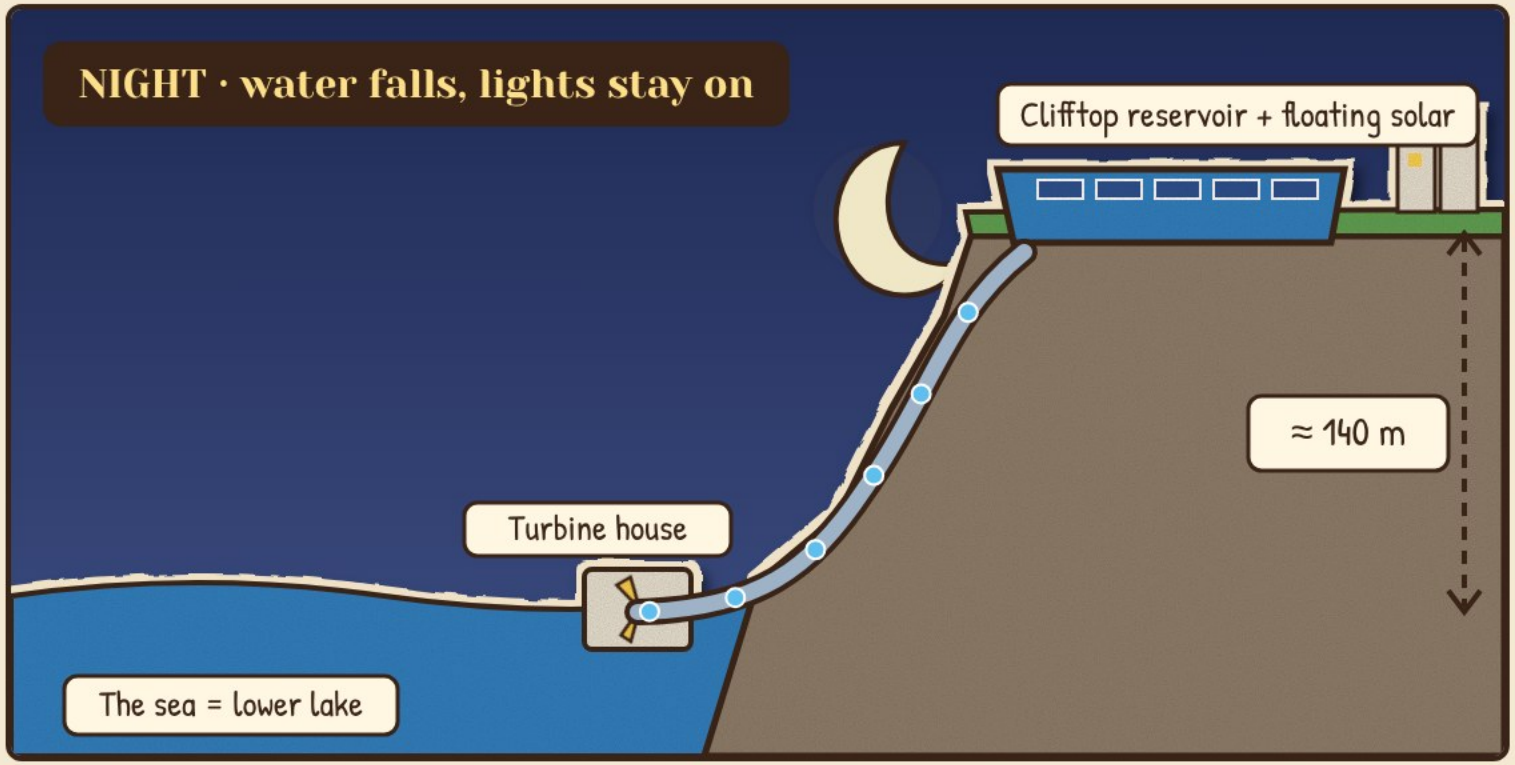

ATTACK 2
The Blackout

Engineer Bách
Energy Engineer

ENGINEER BÁCH · INNOVATION 01

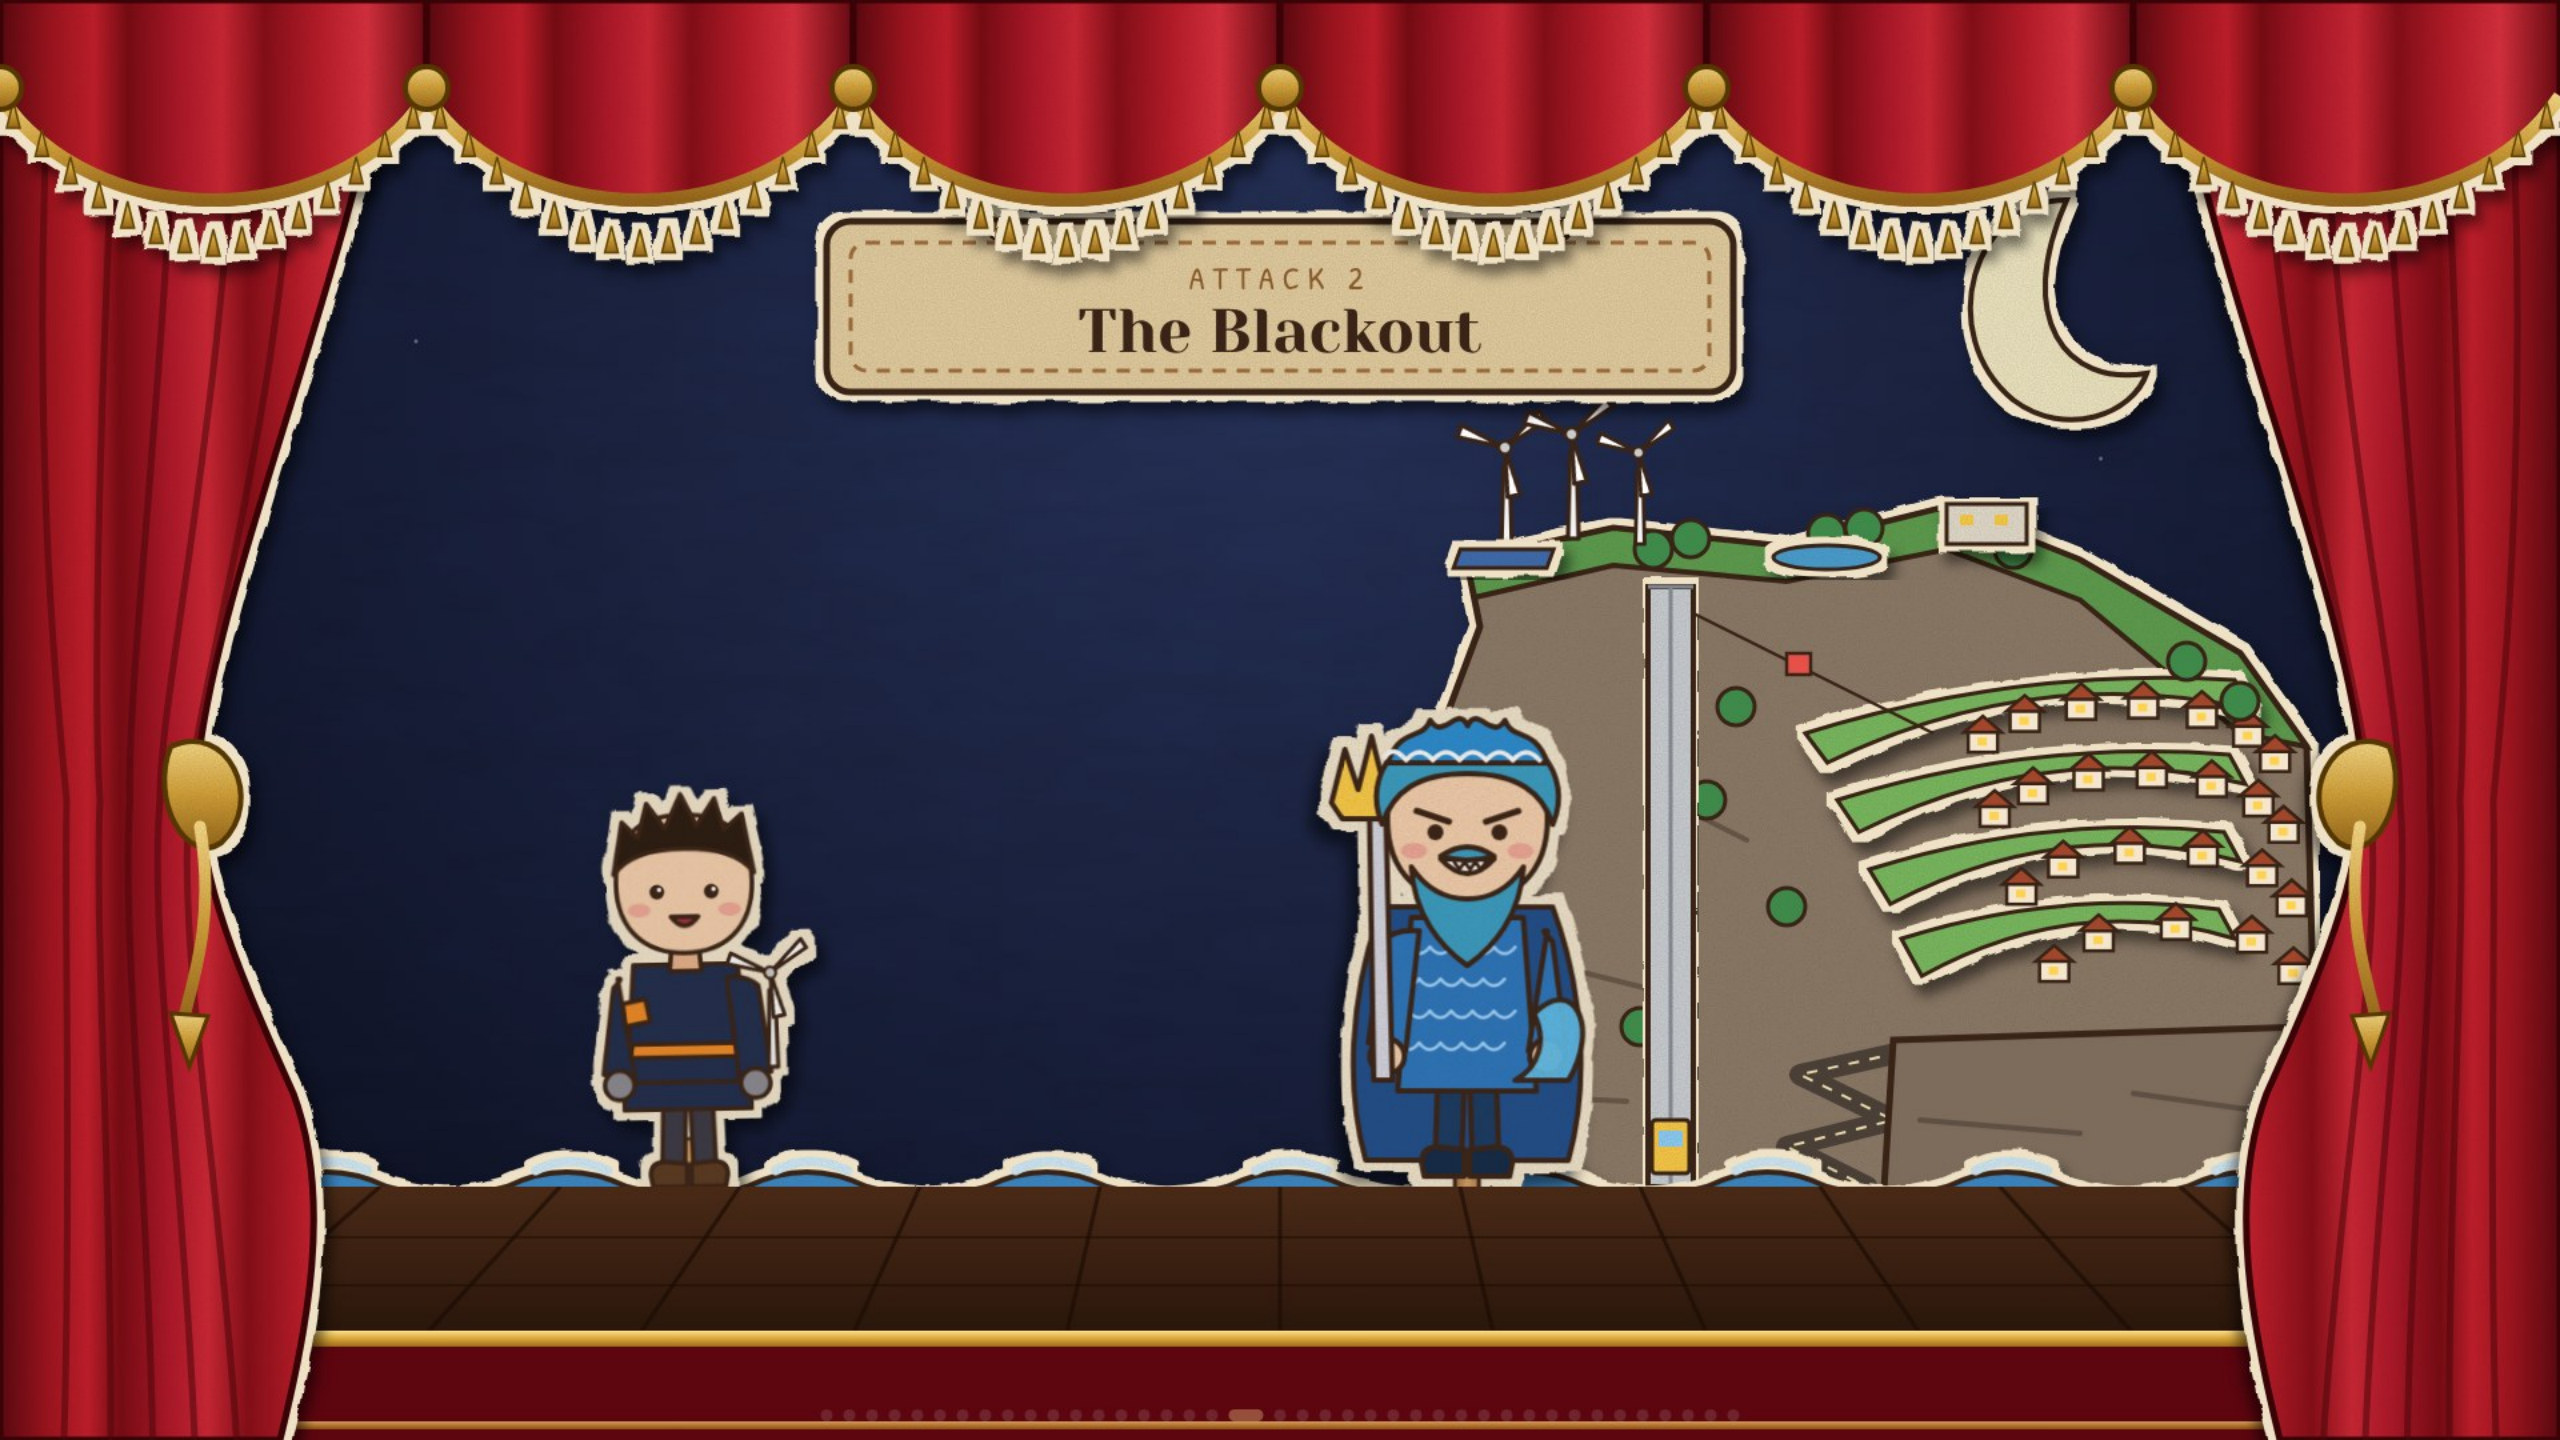

Your sea becomes our battery

Okinawa
Japan ran a seawater plant, 1999–2016

No diesel
no smoke · a tiny carbon footprint

Eco-friendly
power stays local in a storm

ATTACK 2
The Blackout

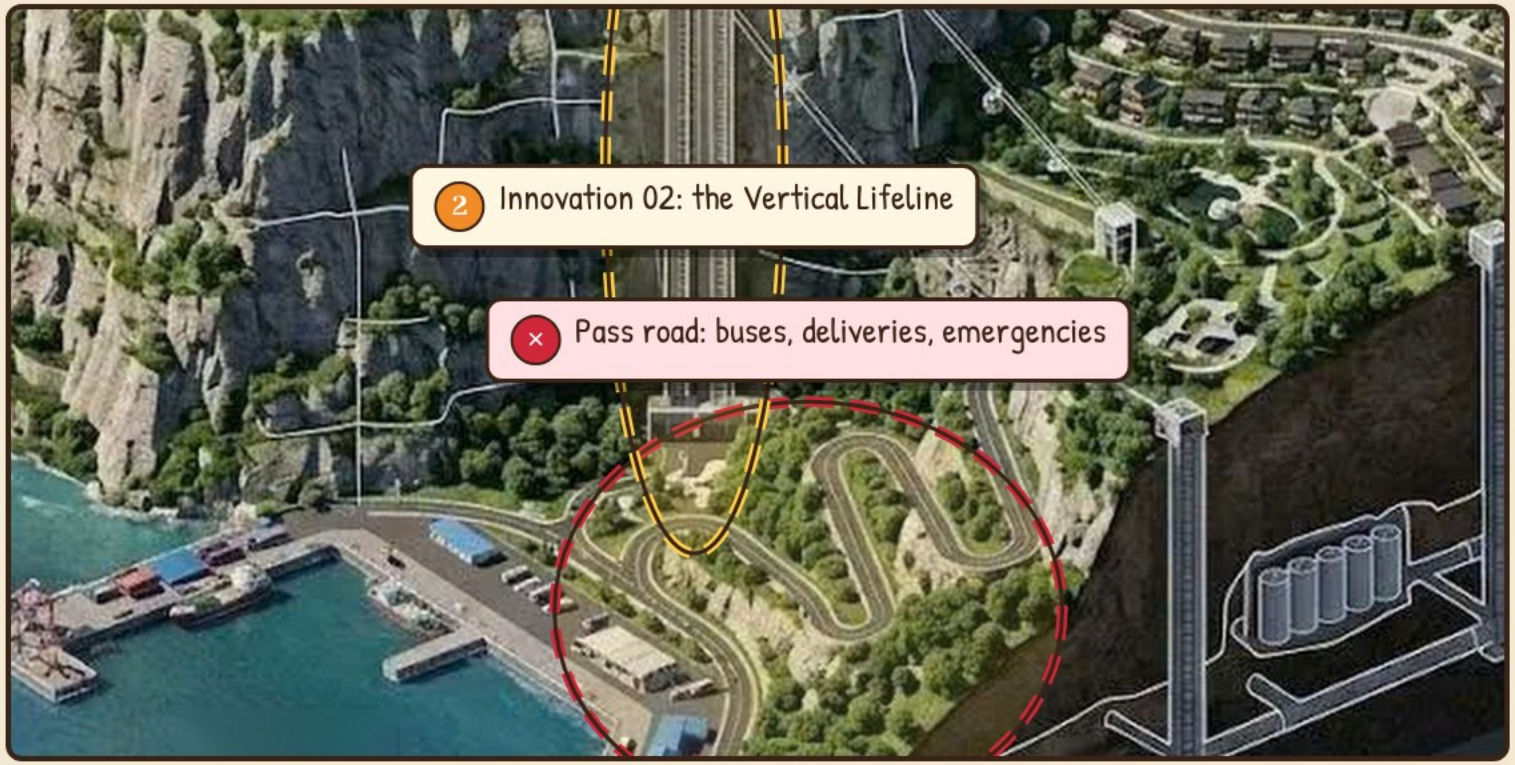

ATTACK 3
The Blocked Road

Architect Huy
Chief Architect

ARCHITECT HUY · TRANSIT

The pass road is for service only

Service only
buses · deliveries · emergencies

Most people
ride the Vertical Lifeline

INNOVATION 02

Vertical Lifeline

40

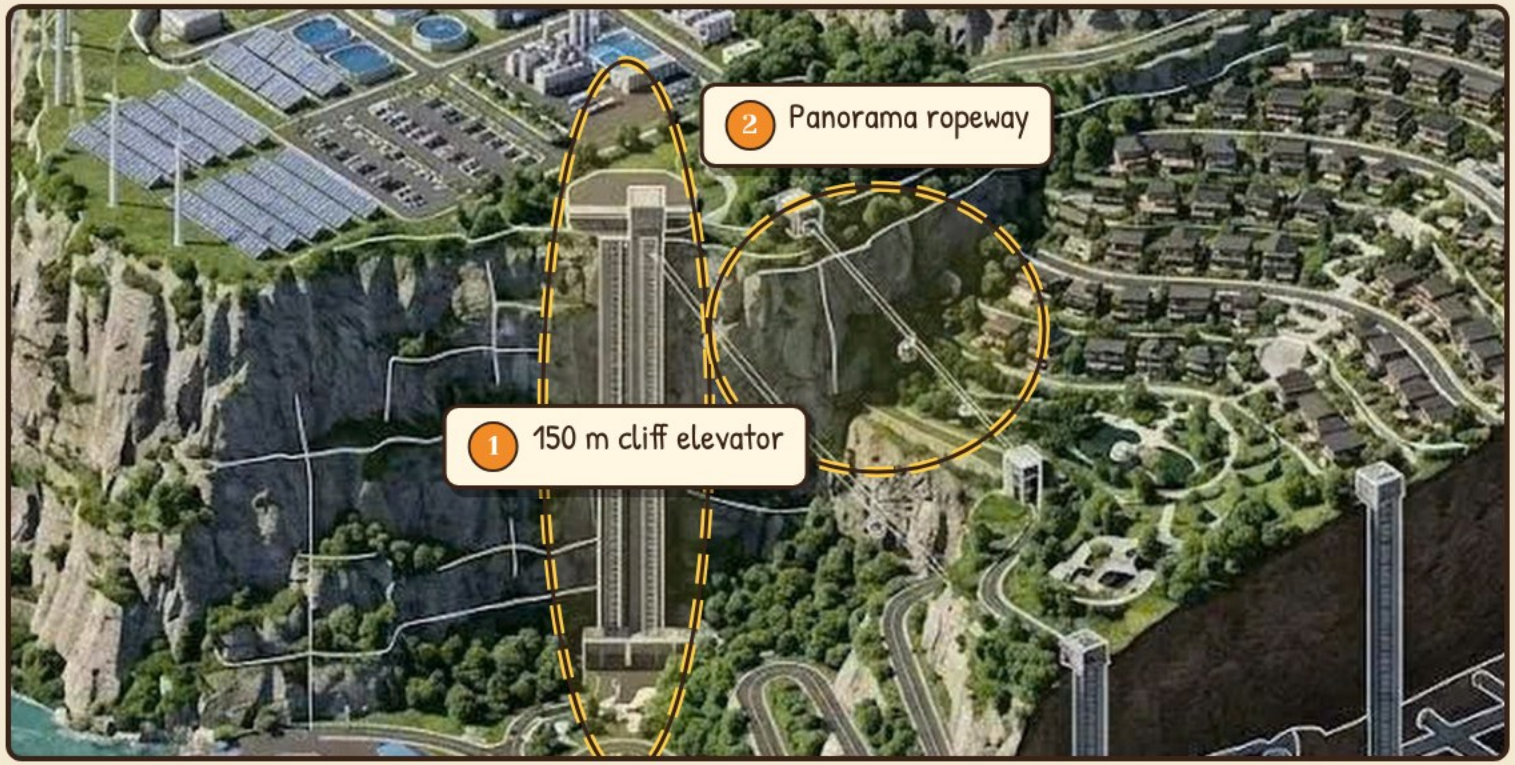

Architect Huy
Chief Architect

ARCHITECT HUY · INNOVATION 02

The Vertical Lifeline

40 s
harbour → clifftop, 150 m

≈ 2,400
people an hour, 2 cars

1 ticket
lift · ropeway · car lift

Regen
lifts going down make power

INNOVATION 02

Vertical Lifeline

FINAL ATTACK
The Landslide

Commander Khang
Safety Commander

COMMANDER KHANG · SAFETY

Slope sensors raise the alarm

Rain
measured on every slope

Ground
movement on the cut benches

Go Below
alarm before a slope fails

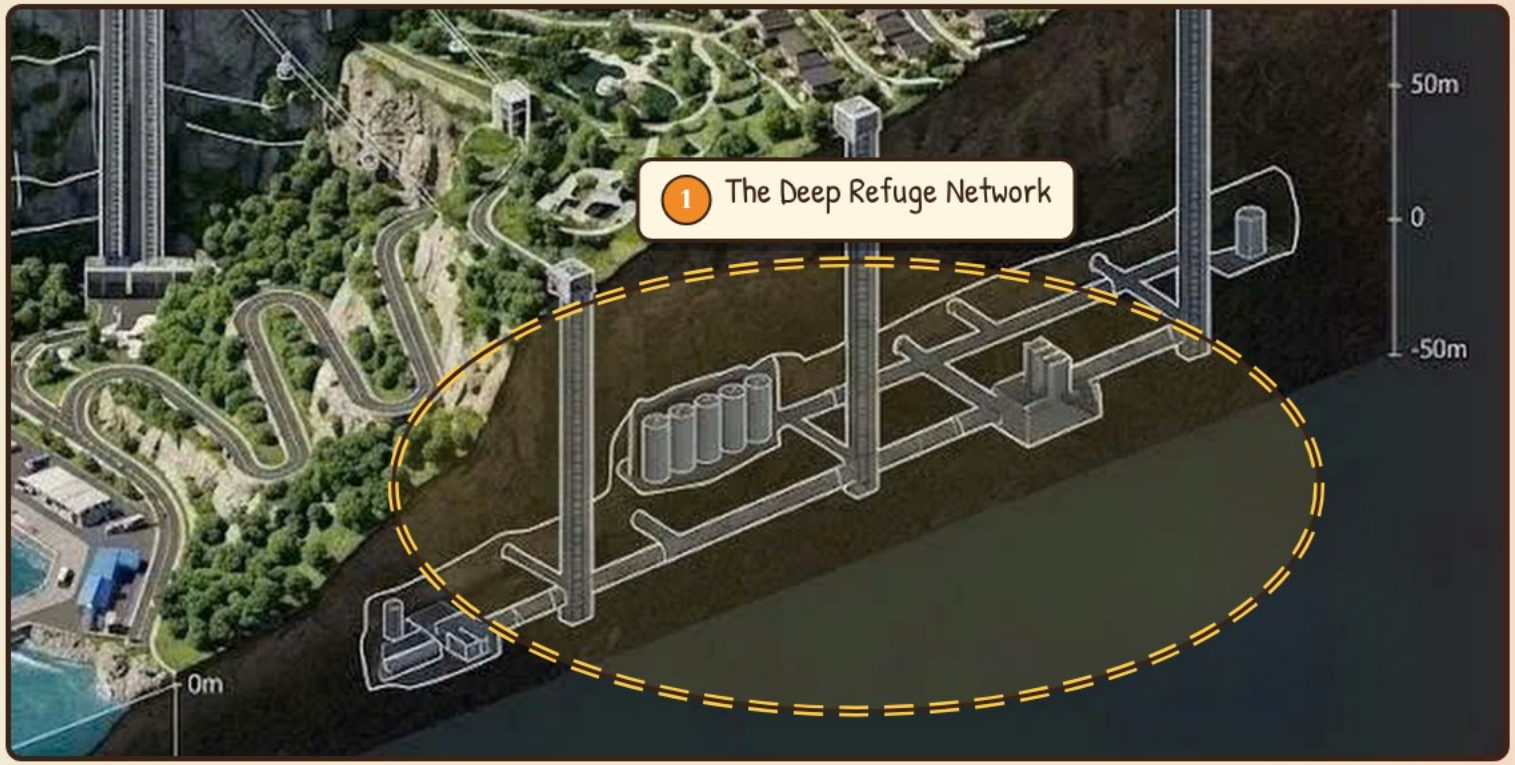

FINAL ATTACK
The Landslide

Commander Khang
Safety Commander

COMMANDER KHANG · INNOVATION 03

We go down, into the rock

Innovation 03
the Deep Refuge Network

Into the rock
safe from landslides and floods

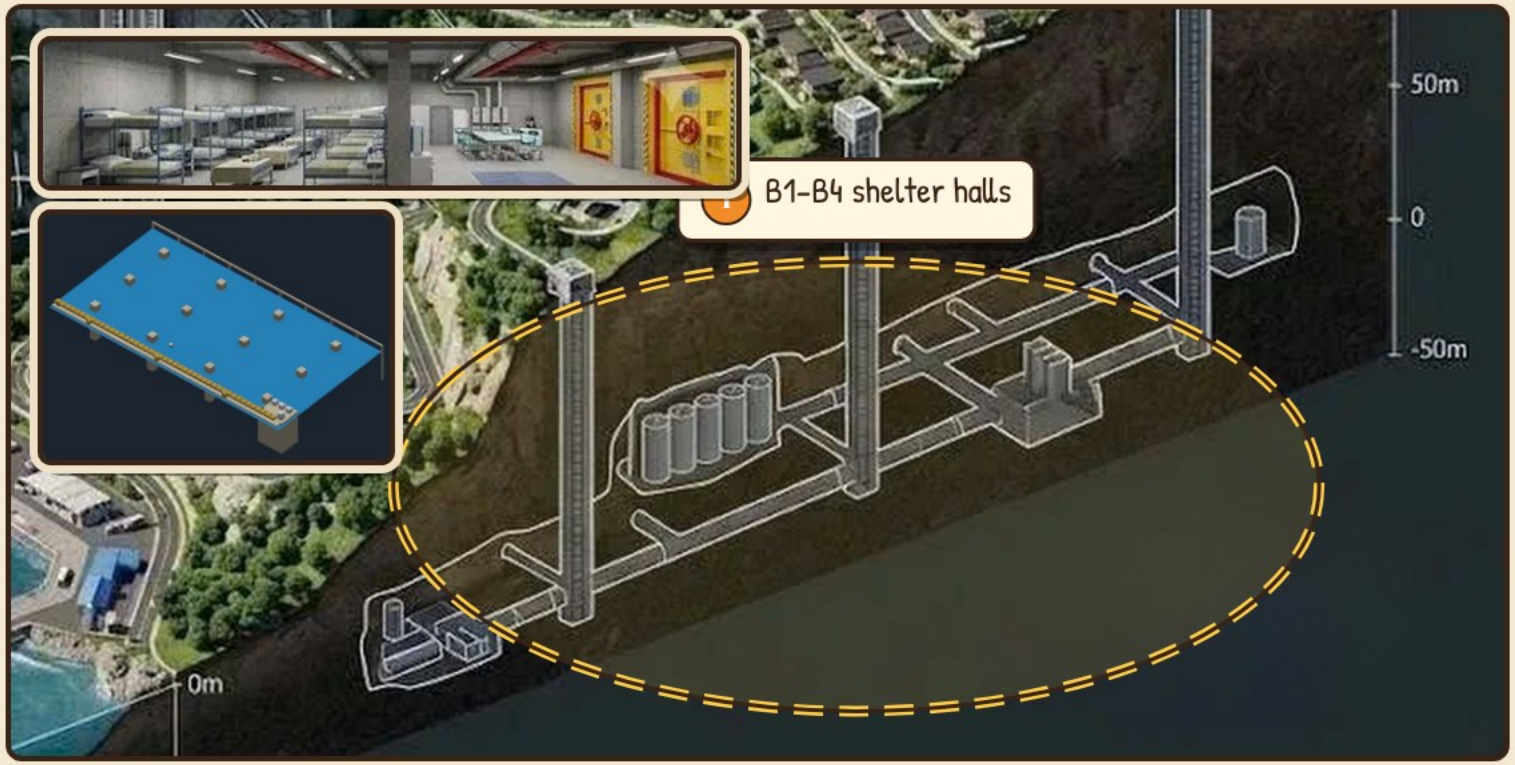

GO BELOW
Into the rock
B1 SHOPPING
B2 DEPOT · FOOD
B3 SHELTER
B4 NIGHT MARKET

Commander Khang
Safety Commander

COMMANDER KHANG · INNOVATION 03

Everyone has a place in the rock

< 10 min
to a shelter from any terrace

B3
sealed by blast doors

6,000 m³
of water for 30+ days

Heli-Base
flies the injured out

SAFE BELOW
The Night Market
B1 SHOPPING
B2 DEPOT · FOOD
B3 SHELTER
B4 NIGHT MARKET

Commander Khang
Safety Commander

COMMANDER KHANG · DUAL-USE SHELTERS

One network, like Helsinki

One network: warn · shelter · water · rescue

Slope sensors
rain + ground

"Go Below"
city-wide alarm

Shelters
B1 · B2 · B3 · B4

Ridge Cistern
6,000 m³ of water

Heli-Base
rescue flights

Helsinki
≈ 5,500 shelters, used every day

Dual-use
a market by day, a shelter in a storm

1 network
shelters · water · rescue · warnings

THE STORM
is over
MAYOR

SCENE 6

Peace & the Pitch

An honest look

- ✕ Building into a cliff costs a lot
- ✕ It takes a long time to build
- ✕ Lifts need constant maintenance
- ✕ Some people may not enjoy being underground

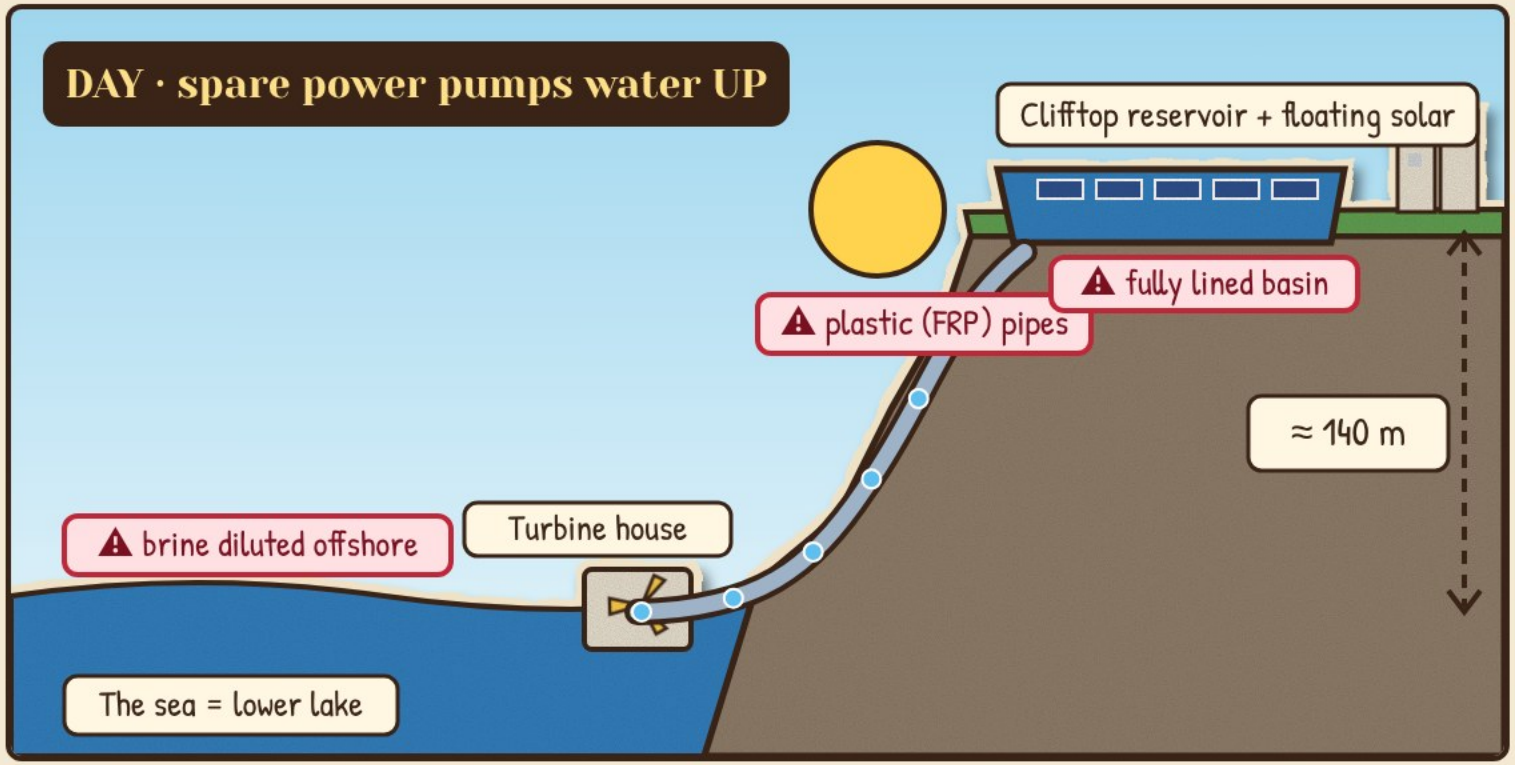

Engineer Bách
Energy Engineer

ENGINEER BÁCH · HONEST LIMITS

Seawater is tough on machines

Corrosion
lined reservoir + plastic (FRP) pipes

Brine
blended, then released far offshore

Okinawa
solved it the same way

SCENE 6

Worth it

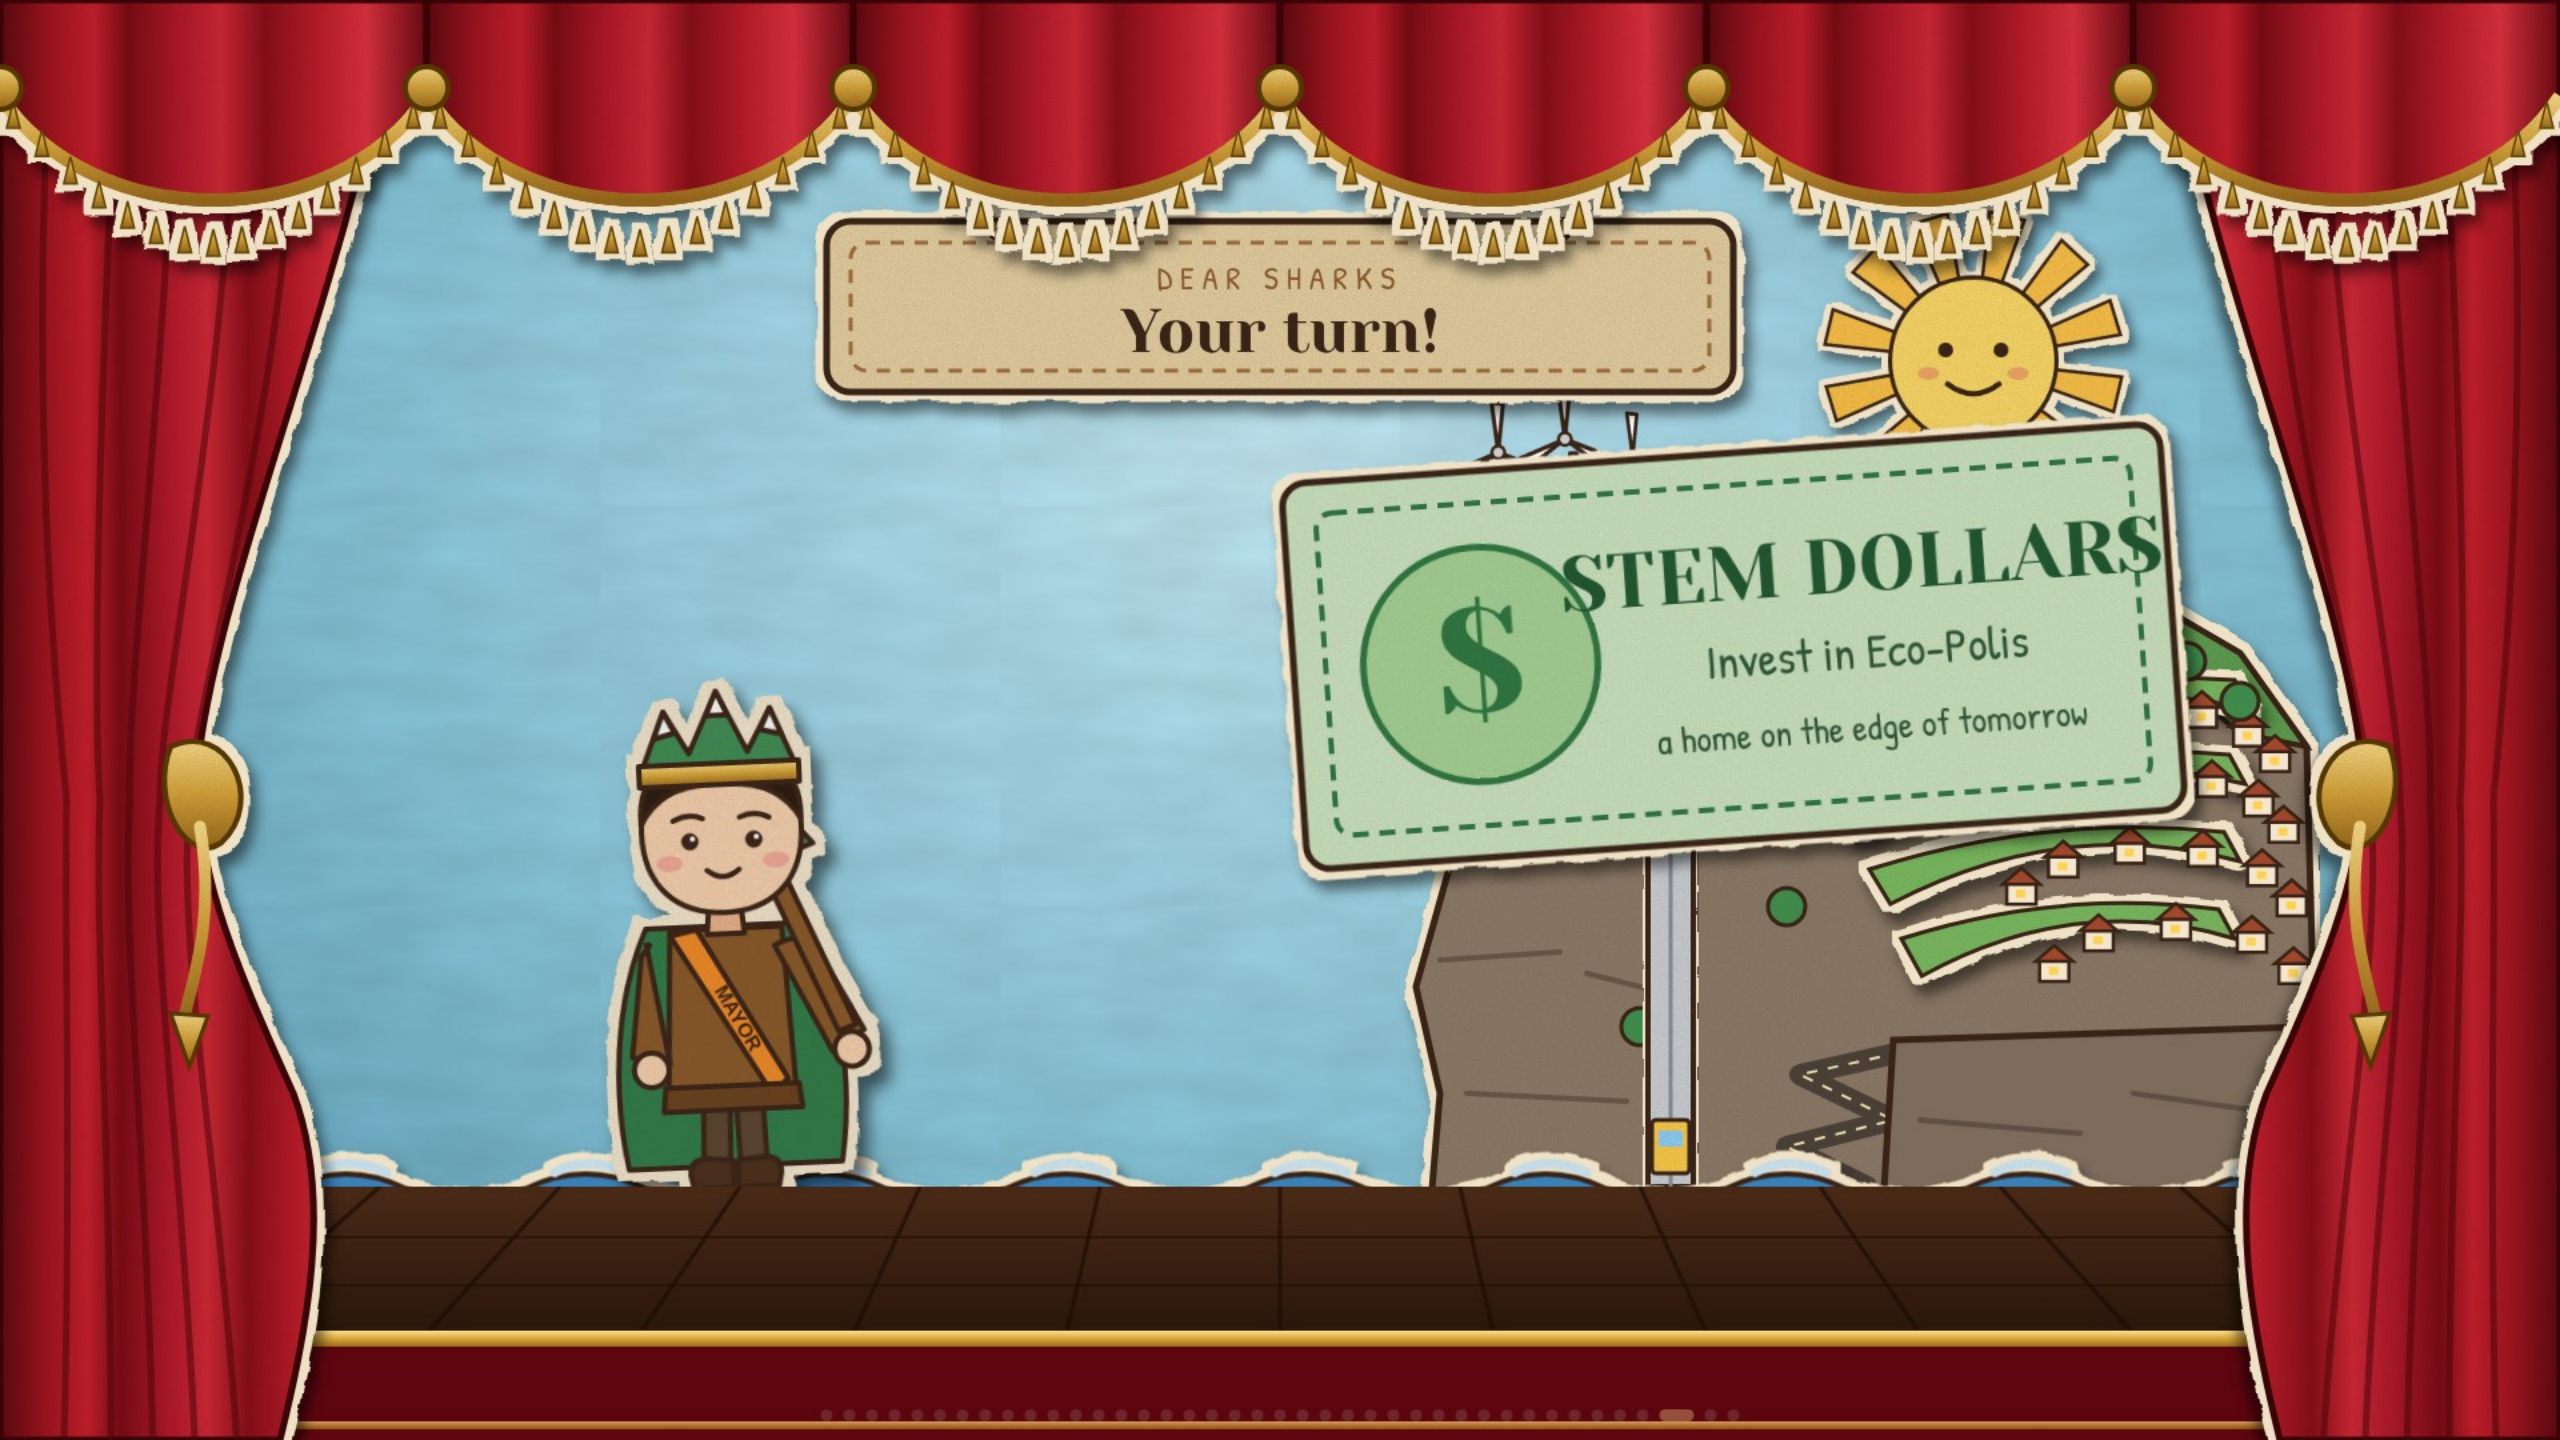

Safe for 100 years

- ✓ No fuel imports
- ✓ Cheaper homes
- ✓ Far less rebuilding after disasters
- ✓ A shelter place for every resident

PEACE
Powered by the sea
MAYOR

DEAR SHARKS
Your turn!
STEM DOLLARS
Invest in Eco-Polis
a home on the edge of tomorrow
MAYOR

Carved by nature. Powered by the sea. Built for everyone!

Linh — Princess Mỵ Nương

Nguyên — Sơn Tinh · the Mayor

Huy — Chief Architect

Bách — Energy Engineer

Khang — Safety Commander

Hưng — Thủy Tinh · the Sea God

Questions from the Sharks
